

DOE Office of Energy Efficiency and Renewable Energy issues a "LightMAT Consortium Call Now Open" bulletin

Department of Energy's Office of Energy Efficiency and Renewable Energy issues a "LightMAT Consortium Call Now Open" bulletin on **May 15, 2023**.

The Lightweight Materials Consortium (LightMAT) seeks proposals from industry to partner with national laboratories on lightweight material innovations

LightMAT has announced its annual funding opportunity for 2023 for the automotive industry to leverage technical assistance from Department of Energy national laboratories. LightMAT seeks proposals to identify key technical challenges limiting the use of lightweight materials that can further improve the energy efficiency of conventional and electric vehicles. Proposals are due **June 12, 2023**.

Application materials are available on the LightMAT [Funding Opportunities](#) web page.

LightMAT is managed by Pacific Northwest National Laboratory in partnership with other national laboratories and is funded by DOE's [Vehicle Technologies Office](#).
